

Exp- 20 Person DOB Knowledge Base

Program:

```
dob = {  
    "rahul": "12-05-2003",  
    "priya": "18-09-2002",  
    "arun": "25-12-2001",  
    "meena": "10-03-2004"  
}  
  
name = input("Enter person's name: ").lower()  
  
if name in dob:  
    print("Date of Birth:", dob[name])  
  
else:  
    print("Person not found.")
```

Output:

The screenshot displays a Python IDE with two windows. The left window, titled 'Exp-20 Person DOB Knowledge Base.py', contains the source code for a program that checks if a person's name is in a dictionary of DOBs. The right window, titled 'IDLE Shell 3.13.5', shows the execution output. The user entered 'priya', and the program correctly output 'Date of Birth: 18-09-2002'.
